### What are the risks of investing?

#### Risk indicator for the International Fixed Interest Fund<sup>1</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets

goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz](http://sorted.org.nz). Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 30 June 2012 to 30 June 2017<sup>1</sup>. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund Updates.

See the Private Wealth Series product disclosure statement (PDS) for more information about the risks associated with investing in this Fund.

## Notes

1. As the Fund has not been in existence for 5 years, a combination of actual returns and market index returns have been used to calculate the Fund's risk indicator. The risk indicator, therefore, may provide a less reliable indicator of the potential future volatility of the Fund.
2. The annual Fund charges for the Fund include a best estimate of 1) the costs and expenses charged by the underlying investment funds (other than the management fees of the underlying investment fund managers) into which the Fund invests; and 2) expenses which BNZ Investment Services Limited (as Manager) and The New Zealand Guardian Trust Company Limited (as Supervisor) may charge the Fund as permitted by the Governing Document. These estimates are based on the costs and expenses disclosed in the underlying investment fund offer documents, or where such offer documents do not exist, verification from the relevant underlying investment manager. The expenses incurred by BNZ Investment Services Limited and The New Zealand Guardian Trust Company Limited included in the annual Fund charges are based on estimates provided by service providers or where these do not exist, a review of the expenses incurred by similar products for similar expenses. Actual expenses will vary.
3. Because this Fund started operating on 1 February 2017, the Fund's market index return for the full year referred to in the section "How has the Fund performed" has been used in this example rather than the actual Fund return (which only exists for a partial year). The market index return referred to in the section "How has the Fund performed?" reflects no deductions for Fund charges, and so has been adjusted for the purposes of this example. This example generally illustrates how fees may affect an investor holding \$10,000 in the Fund for a year. It does not reflect the impact of buy/sell spreads that may apply when a person makes a new or additional contribution into the Fund, or withdraws from the Fund. For more information on buy/sell spreads, see the PDS for the Private Wealth Series.
