#### What are the risks of investing?

##### Risk indicator<sup>1</sup> for the NZ Bond Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz](https://sorted.org.nz)

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 31 December 2020 to 31 December 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund Updates.

See the Private Wealth Series Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

## Notes

1. As the Fund has been operating for less than five years, we have used a mix of actual and market index returns for the five-year period to 31 December 2025 to calculate its risk indicator. This means it may provide a less reliable indicator of the potential future volatility of the Fund. The inception date for the Fund was 22 September 2025. The Fund's risk indicator is based on market index returns from 1 January 2021 to 30 September 2025 and actual returns from 1 October 2025 to 31 December 2025.
2. As the fund started on 22 September 2025, it has not been in existence for a full scheme year. This example is based on the actual returns since inception, after deductions for charges and tax. It is not an annualised return.
3. The calculation of cash and cash equivalents within the actual investment mix allocation may include investor flows not yet unitised, liquidity cash and fund accruals but excludes cash and cash equivalents held by our investment managers for operational purposes which are categorised within the asset class to which they apply.
4. Investor flows not yet unitised, outstanding settlements, and any operating accruals, are excluded from the Top 10 investments.
