

Fund Update

For quarter ending 30 September 2019

This Fund Update was first made publicly available on 29 October 2019.

What is the purpose of this update?

This document tells you how the Income Fund (Fund) has performed and what fees were charged. The document will help you to compare the Fund with other funds. BNZ Investment Services Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

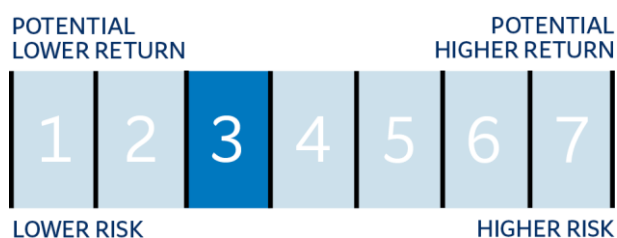

Description of this Fund

The Income Fund invests mostly in income assets, which generally have lower levels of risk and potential returns. It also has a modest allocation to growth assets, which generally have higher levels of risk with the potential for higher returns. It aims to achieve relatively stable returns over the short to medium term.

Total value of the Fund	\$10,082,231.12
Date the Fund started	21 May 2018

What are the risks of investing?

Risk indicator¹ for the Income Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz. Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 30 September 2014 to 30 September 2019. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund Updates.

See the YouWealth Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

How has the Fund performed?

	Past year
Annual return (after deductions for charges and tax)	5.38%
Annual return (after deductions for charges but before tax)	7.09%
Market index annual return (reflects no deductions for charges and tax)	9.21%

The market index (benchmark) return is based on a composite index made up of related market indices that represent the target investment mix (including currency hedging where relevant). Additional information can be located in the 'Statement of Investment Policy and Objectives' document available on the Scheme's Disclose Register entry at companiesoffice.govt.nz/disclose

What fees are investors charged?

Investors in the Income Fund are charged Fund charges. In the year to 31 March 2019 these were (excluding GST):

	% of net asset value
Total fund charges*	1.10%
<i>Which are made up of:</i>	
Total management and administration charges	1.10%
<i>Including:</i>	
Manager's basic fee	1.10%
Other management and administration charges	0.00%
Total performance-based fees	0.00%

* The total management and administration fee for the Fund was reduced to 0.78% effective 13 May 2019. As a result, the total fund charges for the Fund for the year to 31 March 2020 are expected to be up to 29% lower.

See the YouWealth PDS for more information about these fees. This can be accessed from the Disclose Register at companiesoffice.govt.nz/disclose

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

John had \$10,000 in the Fund at the start of the year and did not make any further contributions. At the end of the year, John received a return after Fund charges were deducted of \$538.00 (that is 5.38% of his initial \$10,000). John also paid \$0.00 in other charges. This gives John a total return of \$538.00 for the year.

Currency hedging

Currency hedging may be used to mitigate the impact of currency movements on investments in foreign securities. As at 30 September 2019 currency hedging is as follows:

- International fixed interest – 100% hedged to NZD
- International equities – 40% hedged to NZD (target 50%)
- Australian equities within the Australasian equity investment mix – 95% hedged to NZD (range between 0 - 100%)

The Statement of Investment Policy and Objectives (SIPO) sets out the policy for our currency hedging strategy in Section 5 and is available on the Scheme's Disclose Register entry at companiesoffice.govt.nz/disclose

What does the Fund invest in?

This shows the types of assets the Fund invests in.

Actual investment mix²

This shows the mix of assets the Fund generally intends to invest in.

Target investment mix

Top 10 investments³

Notes

1. As the Fund has not been in existence for 5 years, a combination of actual returns and market index returns have been used to calculate the Fund's risk indicator. The risk indicator, therefore, may provide a less reliable indicator of the potential future volatility of the Fund.
2. The calculation of cash and cash equivalents within the actual investment mix allocation may include investor flows not yet unitised, liquidity cash and fund accruals. This may result in a higher allocation to cash and cash equivalents than is shown in the target investment mix.
3. Investor flows not yet unitised, unsettled trades, currency hedging gains (or losses) and any operating accruals are excluded from the Top 10 investments.
