BNZ KiwiSaver Scheme
High Growth Fund

Fund Update
For quarter ending 30 September 2026

This Fund Update was first made publicly available on 29 October 2026.

What is the purpose of this update?

This document tells you how the High Growth Fund (Fund) has performed and what fees were charged. The document will help you to compare the Fund with other funds. Harbour Asset Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

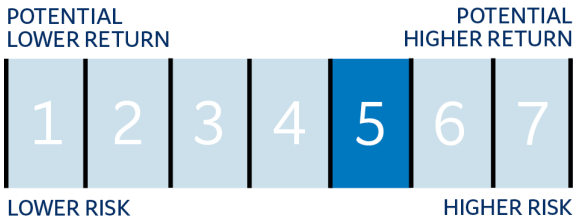

Description of this Fund

The High Growth Fund invests primarily in growth assets, which generally have higher levels of risk with the potential for higher returns. It may also allocate investment to income assets, which generally have lower levels of risk and potential returns. It aims to achieve the highest returns of the Funds in the BNZ KiwiSaver Scheme over the long term.

Total value of the Fund	$679,125,367.30
Number of investors in the Fund	19,345
Date the Fund started	28 November 2023

What are the risks of investing?

Risk indicator[1,2] for the High Growth Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at **bnz.co.nz/whatfund**

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 30 September 2021 to 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund Updates.

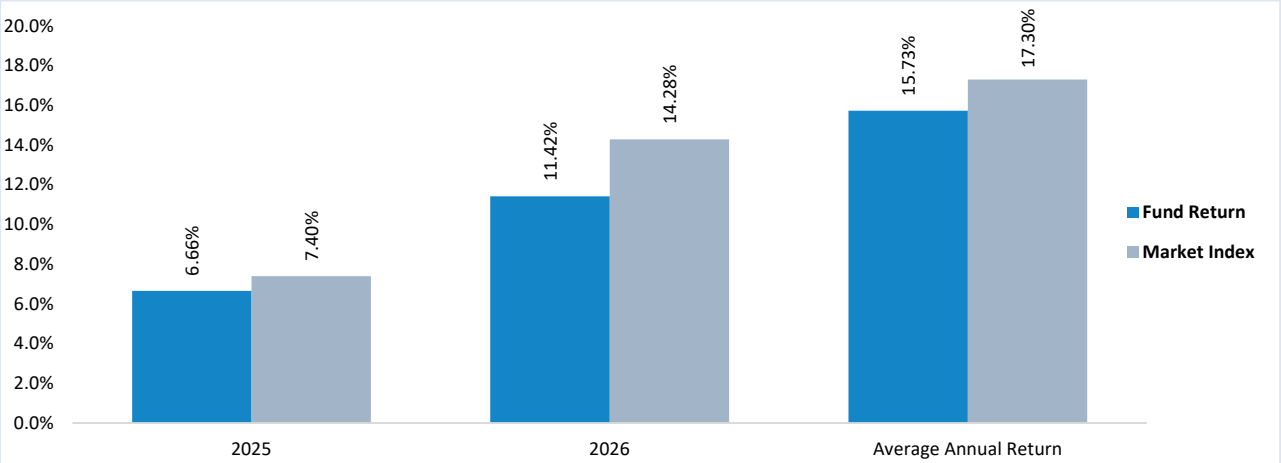

See the BNZ KiwiSaver Scheme Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

How has the Fund performed?

	Past year
Annual return (after deductions for charges and tax)	11.48%
Annual return (after deductions for charges but before tax)	12.28%
Market index annual return (reflects no deductions for charges and tax)	13.31%

The market index (benchmark) return is a composite based on the benchmark indices for the asset classes that make up the Fund's target investment mix. Additional information about the benchmark indices is available on the offer register (search for BNZ KiwiSaver Scheme) at **disclose-register.companiesoffice.govt.nz**

Annual return graph

The graph shows the return after Fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the average annual return since the Fund started, up to 30 September 2026.

Important: This does not tell you how the Fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

Market index returns do not include Fund charges or deductions for tax.

What fees are investors charged?

Investors in the High Growth Fund are charged Fund charges. In the year to 31 March 2026 these were (excluding GST):

	% of net asset value
Total fund charges	**0.45%**
Which are made up of:	
Total management and administration charges	**0.45%**
Including:	
Manager's basic fee	0.45%
Other management and administration charges	0.00%
Total performance-based fees	**0.00%**

The Fund charges above do not include GST. If applicable, GST will be added to the above Fund charges.

See the BNZ KiwiSaver Scheme PDS for more information about these fees. This can be accessed from the Disclose Register at **disclose-register.companiesoffice.govt.nz**

Small differences in fees and charges can have a big impact on your investment over the long term.

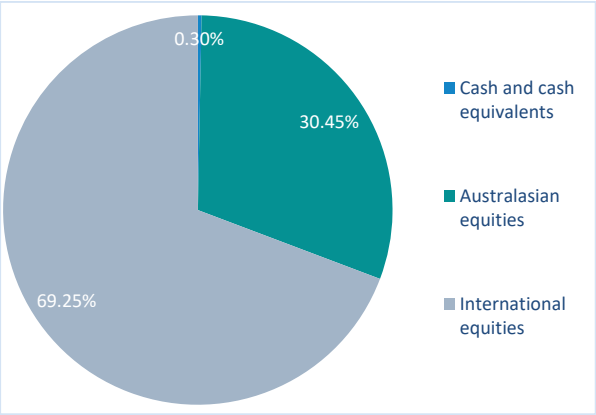

Example of how this applies to an investor

John had $10,000 in the Fund at the start of the year and did not make any further contributions. At the end of the year, John received a return after Fund charges were deducted of $1,228.00 (that is 12.28% of his initial $10,000). John also paid $0.00 in other charges. This gives John a total after tax return of $1,148.00 for the year.

What does the Fund invest in?

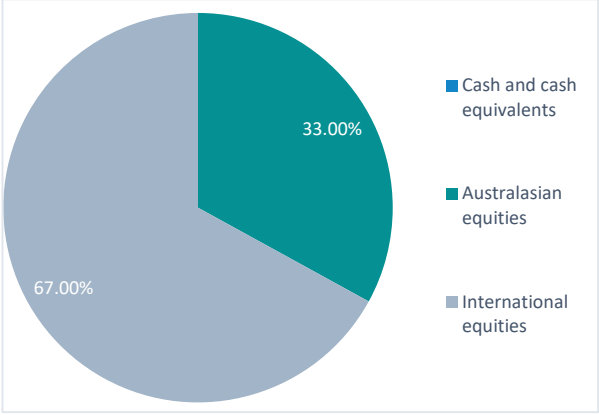

This shows the types of assets the Fund invests in.

Actual investment mix[3]

This shows the mix of assets the Fund generally intends to invest in.

Target investment mix

Currency hedging

Currency hedging may be used to mitigate the impact of currency movements on investments in foreign securities. As at the date of this Fund Update, the Manager applies the following currency hedging ratios:

- 63% of Fund's international equities exposure
- 59% of the Fund's Australian equities exposure within the Australasian equities asset class.

The Statement of Investment Policy and Objectives (SIPO) sets out the policy for our currency hedging strategy in Section 7 and is available on the Scheme's Disclose Register entry at companiesoffice.govt.nz/disclose

Top 10 investments[4]

	Name	% of fund net assets	Type	Country	Credit rating (if applicable)
1	Fisher & Paykel Healthcare	5.52%	Australasian equities	New Zealand	
2	NVIDIA Corp	3.74%	International equities	United States	
3	Infratil	3.58%	Australasian equities	New Zealand	
4	Apple Inc	3.38%	International equities	United States	
5	Microsoft Corporation	2.67%	International equities	United States	
6	Auckland International Airport	2.63%	Australasian equities	New Zealand	
7	Contact Energy	2.19%	Australasian equities	New Zealand	
8	Mainfreight	1.79%	Australasian equities	New Zealand	
9	Amazon.Com Inc	1.69%	International equities	United States	
10	a2 Milk Company	1.54%	Australasian equities	New Zealand	

The top 10 investments make up 28.73% of the net asset value of the Fund.

Notes

1. As the Fund has been operating for less than five years, we have used a mix of actual and market index returns for the five-year period to 30 September 2026 to calculate its risk indicator. This means it may provide a less reliable indicator of the potential future volatility of the Fund. The inception date for the Fund was 28 November 2023. The Fund's risk indicator is based on market index returns from 1 October 2021 to 30 November 2023 and actual returns from 1 December 2023 to 30 September 2026.
2. Because the risk indicator is calculated using the past 5 years' worth of returns, in periods of return volatility the risk indicator is more susceptible to change from time to time.
3. The calculation of cash and cash equivalents within the actual investment mix allocation may include investor flows not yet unitised, liquidity cash and fund accruals but excludes cash and cash equivalents held by our investment managers for operational and hedging purposes which are categorised within the asset class to which they apply.
4. Investor flows not yet unitised, outstanding settlements, currency hedging gains (or losses), collateral positions held for derivative or hedging purposes, and any operating accruals, are excluded from the Top 10 investments.
