

Fund Update

For quarter ending 30 September 2018

This Fund Update was first made publicly available on 25 October 2018.

What is the purpose of this update?

This document tells you how the Cash Fund (Fund) has performed and what fees were charged. The document will help you to compare the Fund with other funds. BNZ Investment Services Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this Fund

The Cash Fund provides an exposure to New Zealand short-term cash securities (on-call bank deposits) and cash equivalent securities (bank term deposits, bonds, bills and floating-rate notes with maturities less than 365 days). It aims to achieve stable returns over the short term and provide a gross return in excess of its benchmark index.

Total value of the Fund	\$84,413,423.96
Date the Fund started	1 February 2017

What are the risks of investing?

Risk indicator¹ for the Cash Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz. Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 30 September 2013 to 30 September 2018. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future Fund Updates.

See the Private Wealth Series Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

How has the Fund performed?

	Past year
Annual return (after deductions for charges and tax)	1.64%
Annual return (after deductions for charges but before tax)	2.28%
Market index annual return (reflects no deductions for charges and tax)	1.96%

The market index (benchmark) return is based on the S&P/NZX Bank Bills 90-Day Index. Additional information can be located in the 'Market Indices' document available on the Scheme's Disclose Register entry at disclose-register.companiesoffice.govt.nz

Annual return graph

The graph shows the return after Fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the average annual return since the Fund started, up to 30 September 2018.

Important: This does not tell you how the Fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

Market index returns do not include Fund charges or deductions for tax.

Example of how this applies to an investor

John had \$10,000 in the Fund at the start of the year and did not make any further contributions. At the end of the year, John received a return after Fund charges were deducted of \$164.00 (that is 1.64% of his initial \$10,000). John also paid \$0.00 in other charges. This gives John a total return of \$164.00 for the year.

What fees are investors charged?

Investors in the Cash Fund are charged Fund charges. In the year to 31 March 2018 these were (excluding GST):

	% of net asset value
Total fund charges	0.37%
<i>Which are made up of:</i>	
Total management and administration charges	0.37%
<i>Including:</i>	
Manager's basic fee	0.29%
Other management and administration charges	0.08%
Total performance-based fees	0.00%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). Investors are not currently charged individual actions fees.

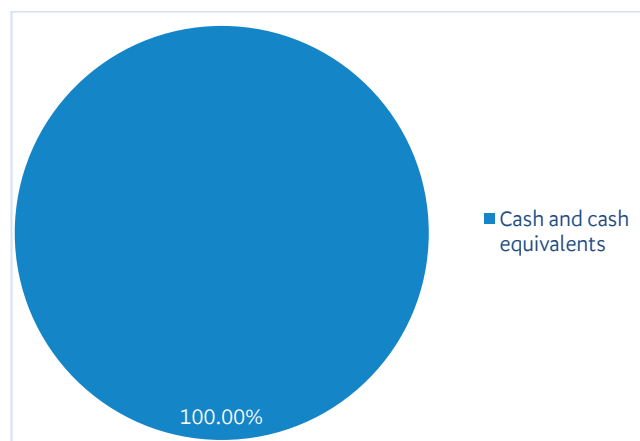

See the Private Wealth Series PDS for more information about these fees. This can be accessed from the Disclose Register at disclose-register.companiesoffice.govt.nz

Small differences in fees and charges can have a big impact on your investment over the long term.

What does the Fund invest in?

This shows the types of assets the Fund invests in.

Actual investment mix*

This shows the mix of assets the Fund generally intends to invest in.

Target investment mix

* The percentage of cash and cash equivalents in this graph may differ to those stated in the Top 10 investments table as they can include operating and fund accruals.

Top 10 investments

Notes

1. As the Fund has not been in existence for 5 years, a combination of actual returns and market index returns have been used to calculate the Fund's risk indicator. The risk indicator, therefore, may provide a less reliable indicator of the potential future volatility of the Fund.
